PROFESSIONAL SUMMARY

Senior Software Developer with 6+ years building production-grade SaaS platforms, enterprise ERP-integrated systems, and mobile APIs. Expert in Laravel/PHP, Vue.js 3, real-time architectures, and multi-tenant SaaS, with hands-on experience integrating Python scripts into Laravel workflows for data processing and automation. Holds a Computer Science B.Sc. from Al-Azhar University, graduating 2nd in class with Very Good honors, and a Pre-Master's in CS (2025) with coursework in Distributed Systems and Advanced Databases (MongoDB, Graph DB). Open to remote opportunities.

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Sep 2020 – Present (6 yrs)

Matrix Clouds, Maadi · The Tailors Dev, 6th of October City

- Architected Mnjz — multi-tenant WhatsApp Business SaaS serving 200+ organizations: team inbox, bulk campaigns, Flow Builder automation, AI replies, subscription billing, and REST APIs for mobile integrations.
- Optimized Mnjz chat loading time by 92% (from 10s to under 0.8s) for clients with 13,000+ contacts through query optimization, unused column removal, MySQL indexing, and Redis caching.
- Built CashVero, Vero Analysis & CFO Tools — enterprise treasury and financial feasibility platforms: CashVero deployed for a dedicated enterprise client with ongoing maintenance, Vero Analysis serving 20+ clients, covering 10+ modules (loans, LC/LG, deposits, IRR/NPV modeling, S-curve planning), Odoo ERP integration (XML/JSON-RPC), and bilingual dashboards.
- Built a multi-vendor e-commerce marketplace with JWT/Sanctum mobile API, vendor wallet system, Saudi ZATCA e-invoicing compliance, and Aramex shipping integration.
- Developed Ladies (Nawaem) back-end serving 100+ users: women-focused ride-hailing with geospatial driver matching, digital wallet, Firebase tracking, PayFort payments, and driver gamification.
- Integrated MyFatoorah, PayMob & Stripe; built Hayakarima platform back-end and mobile APIs using Laravel MVC/Repository patterns.
- Ran Python scripts alongside PHP within a Laravel project for data-processing and automation tasks, invoking them via shell exec/queued jobs to extend backend functionality beyond native PHP.
- Performed Laravel 9→12 / PHP 8.0→8.4 full migration, resolving 1000+ PHPStan/Larastan errors; enforced PHPUnit coverage on critical modules.
- Implemented Pusher broadcasting, Firebase FCM/Firestore, Supervisor queue workers, Redis caching, GitHub Actions CI/CD, and Arabic OCR pipeline (Tesseract + Google Vision API).

TECHNICAL SKILLS

Back-End

- PHP / Laravel
- Python (scripting)
- REST API Design
- MySQL · Redis · MongoDB
- PHPStan / PHPUnit
- Supervisor · Queue Workers
- Repository Pattern / MVC

Front-End & Tools

- Vue.js 3 · Inertia.js · TypeScript
- Tailwind CSS / Bootstrap 5
- JavaScript · Alpine.js · jQuery
- Git (GitHub / Bitbucket)
- Nginx · PHP-FPM · cPanel/WHM
- GitHub Actions CI/CD

Integrations

- WhatsApp Cloud API · OpenAI
- Firebase (FCM / Firestore) · Pusher
- Stripe · PayMob · MyFatoorah
- Odoo ERP (XML/JSON-RPC)
- Google Maps / Vision API
- AWS S3 · Twilio · PayFort

Compliance & Data

- ZATCA · Aramex
- MongoDB · Graph DB
- Distributed Systems

KEY PROJECTS

Mnjz — WhatsApp Business SaaS | *Laravel · Vue.js 3 · Inertia.js · TypeScript · WhatsApp Cloud API · OpenAI · Firebase*

- Multi-tenant SaaS serving 200+ organizations for WhatsApp engagement: real-time team inbox, bulk campaign engine, visual Flow Builder, AI-assisted replies, and subscription billing.

CashVero / Vero Analysis / CFO Tools — Enterprise Finance Suite | *Laravel · PHP · Odoo ERP · MySQL · Vue.js · GitHub*

Actions · PHPStan

- CashVero: enterprise-grade treasury system deployed for a dedicated client with full ongoing maintenance. Vero Analysis: multi-client platform serving 20+ clients with Odoo ERP bidirectional sync, cash-flow/aging/forecasting dashboards, RBAC, and bilingual (EN/AR) UI.
- CFO Tools feasibility SaaS for hospitality/entertainment: IRR/NPV/payback engines, S-curve construction planning, revenue forecasting (rooms, F&B, gaming), loan structuring, and investor-ready financial reports with Excel/PDF export.

Multi-Vendor Marketplace | *Laravel · JWT/Sanctum · ZATCA · Aramex · Twilio · Firebase*

- Full multi-vendor e-commerce platform with admin dashboard, JWT mobile API, vendor wallet/withdrawals, and Saudi ZATCA e-invoicing compliance.
- Integrated Aramex shipping, Twilio/FCM push notifications, and real-time order updates via WebSockets.

Ladies (Nawaem) — Women-Focused Ride-Hailing | *Laravel · MySQL Spatial · Firebase · Google Maps API · PayFort · Twilio*

- Client/driver APIs + admin panel serving 100+ users: geospatial matching, dynamic pricing, SOS alerts via WhatsApp, digital wallet, and driver incentive system.

Additional SaaS platforms delivered across property management, consumer finance, edtech, and community/wellness domains, spanning Laravel 5.5–12.

EDUCATION

Pre-Master's Degree — Computer Science

2025

Al-Azhar University · Coursework: Distributed Systems, Advanced Databases (MongoDB, Graph DB)

LANGUAGES

Arabic — Native English — Professional Working Proficiency
